

Safer Communities Are Possible. CVG Can Show You How.

Every city leader shares the goal of making communities safer.

Reducing violence is one of the most urgent responsibilities of city leaders. When lives are lost – communities are fractured and children grow up in fear rather than safety – the entire city suffers.

Increasingly, cities are turning to community violence interventions (CVIs). With proven success, CVIs are essential to achieving safety goals and building stronger, healthier communities.

CVG training turns safety goals into reality.

Cure Violence Global (CVG) equips cities and community-based organizations with evidence-based training and support that have driven large reductions in violence in cities across the world.

- 25+ years of experience in violence prevention
- 100+ communities trained and supported
- 20+ studies showing 30–60% reductions

Now is the moment to bring this success home to your city.

Violence Prevention Training Packages

New Program Package

CVG offers a full package of trainings and services that make violence prevention programs possible. Implementation can be complicated, but CVG guides cities step by step, relying on proven methods. Having worked with more than 100 communities, CVG brings unmatched experience and evidence of reducing violence.

CVG's comprehensive package includes:

- Community engagement
- Program implementation
- Initial and ongoing training
- Technical support
- Program monitoring

Trainings Options

Customizable CVI Training Packages

For existing CVI programs, CVG has a selection of trainings to fit your specific needs. Trainings are specially designed for CVI frontline workers and supervisors to instill the essential information and skills to mediate conflicts and change behaviors. CVG Training can be tailored for the exact package that your CVI needs.

Training topics include:

- De-escalation and interruption
- Case management
- Program management
- Data collection and reporting
- Ecosystem development

High Risk Training Packages

CVG provides specialized customizable training for working with people at high risk for violence. Trainings cover topics such as rapid de-escalation, trust-building, trauma awareness, self-care, risk-reduction planning, and effective referrals. CVG adapts training for any sector, ensuring practical skills for real-world situations.

Examples of sectors for CVG training:

- Teachers and school resource officers
- Social services and social workers
- Hospital staff and programs
- Public health departments
- Workplaces
